Kendall,

Here is the information that you are looking for.

Ok thanks, and please keep us posted.

Also, I'd like to report on the school's improved energy efficiency due to replacing the older T12 fixtures with LED fixtures. Do you have specific info for the new LED fixtures? If not, I'll use the industry estimate of an approximate 71% reduction in energy use per fixture.

If you've gone as far as to calculate the dollar savings using the wattage of the new fixtures and the unit price per kilowatt hour, that would be great too.

Kendall,

Not a problem. We do not have the results back from the testing completed on April 12th. We sent the samples using standard mail so I would expect the results to be back within 2-3 weeks; maybe May 1st. I will ask Fulcrum if they can asked the lab for more specific timelines for them to complete the processing of the filters.

Thanks Devlin, I'll look this over and get back to you if I have any other questions. Have any of the air sample results come back from Fulcrum?

Good Afternoon Kendall,

Here is the information that you requested. Some of the information is a little more difficult to be specific as some of the work and scope of work did not just reflect PCB remediation. However, I have done my best to provide the most accuracy information I could. Here is the following information:

- The total cost to date for PCB remediation include all service work that took place from June 2016 to date for invoices received. This figure does not include testing from Fulcrum as we have not received invoices yet. This figure includes lighting replacement, caulk remediation, consulting, and sampling costs. **\$639,829.76**
- The total projected budget for the sampling at the beginning of the year was anticipated to be **\$66,996.38**. I have included a quarterly bid proposal for one round of testing.
- The number of light fixtures replaced was **519**.
- I have provided the waste manifest for PCB disposal as well as a map of the areas that were remediated.

Let me know if there is anything else you need.

Devlin

Thanks all for making my recent inspection go smoothly. I'd like to get some additional information for my trip report. Specifically,

- total cost of the project to date including sampling and consulting fees
- total project budget including estimate of projected costs to complete required sampling
- total number of light fixtures replaced
- estimate of weight of PCB caulk removed or number of windows remediated

Feel free to include any other relevant details about the project that the school district has gathered to either report or evaluate this project. Let me know if you'd like to meet to discuss.
